

Single-Stock Research Analyst Pack

Symbol: CLS

Benchmark: SPY

Generated At: 2026-03-07 09:09:18

Recommendation: Hold/Watch

Composite Score: 3.51/5.00

Contents:

- 1) Executive summary and scorecard
- 2) Fundamentals, technicals, valuation, and risk tables
- 3) Relative peer table and symbol legend
- 4) Correlation heatmap and risk-return scatter

Executive Decision

symbol	total_score	decision	generated_at
CLS	3.5100	Hold/Watch	2026-03-07 09:09:18

Composite Scores

index	value
business_quality	2.9000
fundamentals	4.0000
technicals	3.1000
valuation	2.0000
risk_fit	4.1000
relative_peer_score	4.6200

Metric Legend

Metric	What It Means	How To Read	Your Value	Interpretation
business_quality	Durability and quality of the business	Higher is better; weak means fragile	Business quality measures company durability: scale, competitive standing, and profitability	
fundamentals	Growth + margins + balance sheet	Higher is better; weak suggests poor financials	Fundamentals measure overall health: growth trend, profit efficiency, and balance sheet	
technicals	Entry timing quality from trend/HMA	Higher is better for timing; low indicates poor timing	Technicals measure timing confidence: momentum and trend quality rather than long-term value	
valuation	How cheap/expensive the stock is versus HMA	Higher is better value; low means overpriced	Valuation measures price attractiveness: whether current price is expensive or reasonably priced	
risk_fit	How suitable the stock is for HMA	Higher is better; weak means down-side risk	Risk Fit measures portfolio behavior: return quality relative to volatility and downside risk	
relative_peer_score	Ranking against peers and HMA	Higher is better; weak means relative underperformance	Relative peer score measures rank among alternatives: how this stock performs against peers
